# Blessing K Gibendi

Computer Science graduate | Software Engineering

**Team lead of 5 · 76% average · Java / Spring Boot · Flutter · Azure CI/CD**

Final-year BSc student who led a six-person team to build and deploy a full-stack platform on Flutter, Spring Boot, PostgreSQL and Azure. Strongest in backend and DevOps, with a growing interest in data science. Seeking a graduate software engineering role.

## PROJECTS

**Supa-Neighbour** — Team Lead, COS 301 Capstone (team of six)

*A neighbourhood task-matching and trust platform. Flutter, Spring Boot, PostgreSQL, Firebase, Azure.*

- Led the team across backend, frontend and infrastructure; reviewed teammates' pull requests, including CI/CD changes.
- Designed and built the task-matching flow (nearby helpers invited at once, first to accept is assigned) and event-driven push notifications.
- Built the delivery pipeline: GitHub Actions → Docker → Azure App Service, with API breaking-change checks, coverage gates, load testing and uptime monitoring.
- Built admin moderation (warnings, suspensions, bans with an audit trail) and a scheduled job that detects endorsement collusion.

### Other projects

- **SPL compiler** (Java, group of three): lexer, LL(1) parser, semantic analysis and C code generation.
- **Data science in R:** Monte Carlo integration and acceptance-rejection sampling.
- **Community-based Project (JCP202):** 84%.

## EXPERIENCE

**Brand Manager (part-time)** — The Career Whisperer, Jan 2022 – Jan 2023

- Scheduled and coordinated client meetings as administrative support to the team.
- Resolved customers' purchase issues on the online store, mainly for masterclass products.

## EDUCATION

2024 – Dec 2026 (expected)
**BSc Computer Science**
University of Pretoria

**76.33%** cumulative average

**23** module distinctions

Top marks: Statistics 220 (84%), Community-based Project (84%), Databases (82%), Statistics 210 (82%)

## SKILLS

**LANGUAGES**
Java · Dart · Python · C++ · SQL · R

**BACKEND**
Spring Boot · JPA/Hibernate · REST/OpenAPI · PostgreSQL · JUnit 5

**MOBILE**
Flutter · Riverpod · Firebase

**CLOUD & DEVOPS**
Azure · Docker · GitHub Actions · CI/CD · JMeter · SonarQube

**TOOLS**
Git · IntelliJ IDEA · VS Code · WSL2
